

STRATEGIES INTO TACTICAL ACTION

Project Navigator, Ltd. is a knowledge, risk and resource management company. Since our inception in 1997, our project managers, engineers and scientists have developed a strong track record for creative problem solving. Our primary service is controlling the strategic direction of demanding projects.

Each project is managed to optimize our clients' interests and save money. Execution strategy is developed with seamless communication with the client.

A cornerstone of our project management approach is the use of Geographical Information System (GIS) techniques for the interpretation and analysis of project data and information. We are known for generating vivid, high quality, understandable graphics to analyze and describe complex problems.

Our GIS techniques are complemented through extensive use of the internet for transferring project information, conducting online meetings, streaming project animations to clients, and hosting onsite web cams. We have designed and currently operate **www.projecttoolbox.com** which is an "always on", web-enabled, project management tool. Projecttoolbox was specifically designed for online bidding and procurement, and for providing a secure project database repository for "client-only" access. This tool translates to better execution efficiency and thereby project cost savings.

Project Navigator, Ltd. is in a growth strategy of serving clients who are pursuing high-risk international projects that require the assistance of a strong, creative, project management organization. This work is being augmented through business relationships.

Data Analysis using Geographical Information Systems (GIS)

- Project strategy development facilitated by GIS 3D data portrayals
- State of the art, site data interpretation and visualization using programs such as:
 - Arc View
 - Arc View 3D analyst
 - Arc View Spatial Analyst
- Clean-up limit cost driver sensitivity analysis
- GIS enabled regulatory negotiations and strategy development
- Web enabled GIS data management
- Impacted volume and cost forecasting
- 3D project calculations animation
- Client access to online project specific GIS product via www.projecttoolbox.com
- GIS facilitation of project life cycle cost analysis
- Risk identification and management
- Project construction visualization and animation
- Project team alignment and goal setting through team discussions of visual data
- Facilitation of project approvals presentations (AFEs)
